

Pili Mai 4K TVs

There are four TVs, all are smart TVs with Internet access and many apps (Hulu, Netflix, Apple, etc.). If you login to an app, please logout before you leave.

There is Spectrum Internet and TV service. The living room TV has a Xumo cable box, and the TVs in the second suite and the bunk bedroom also have the Spectrum app. The primary suite TV does not support the Spectrum app. The Xumo cable box must be operational for Spectrum TV to work on the three supported TVs.

The Spectrum channel lineup is in the TV tray on the coffee table and also printed in the binder. If there is a channel missing that you want, email PiliMai4K@icloud.com and we will see if we can make a change.

Please do not lose the remotes, there is a \$50 charge to replace a lost remote.

Apple AirPlay

All four TVs support Apple AirPlay.

Living Room (Samsung 75")

In most cases, you should only need to use the Xumo remote and NOT the Samsung remote.

The Xumo remote can:

- Turn on/off both the TV and Xumo cable box
- Start apps
- Change volume on TV
- Change TV channels
- Bring up TV mini guide using right button

When you press the power button on the Xumo remote, the TV should power on as well. You should see a screen similar to this:

The “Currently playing” window is the default. Press the center circle button on the Xumo remote to start watching TV. **If there is no signal on TV, also try pressing the center circle button.**

The Xumo cable box is attached to HDMI port 1. There is a Blu-Ray player attached to HDMI port 2. Please DO NOT remove/swap HDMI ports 1 and 2 cables from the TV, as the Samsung TV will try to reconfigure the HDMI port and the existing settings will be lost. Use HDMI ports 3 and 4 for your own attached devices (iPad, game system, etc.).

The Samsung TV remote should only be needed for troubleshooting or switching input to HDMI ports 3 or 4. The Samsung TV also has apps that could be used on the TV instead of on the Xumo cable box. The Samsung TV remote is solar charged, if it is unresponsive, try letting it charge in daylight.

Primary Suite (LG 55”), Second Suite (LG 50”), Bunk Bedroom (LG 43”)

These TVs have many smart TV apps. Feel free to plug in your own device to any HDMI port.
